<a href="#">Tennessee</a>	<a href="#">Texas</a>	<a href="#">Virginia</a>

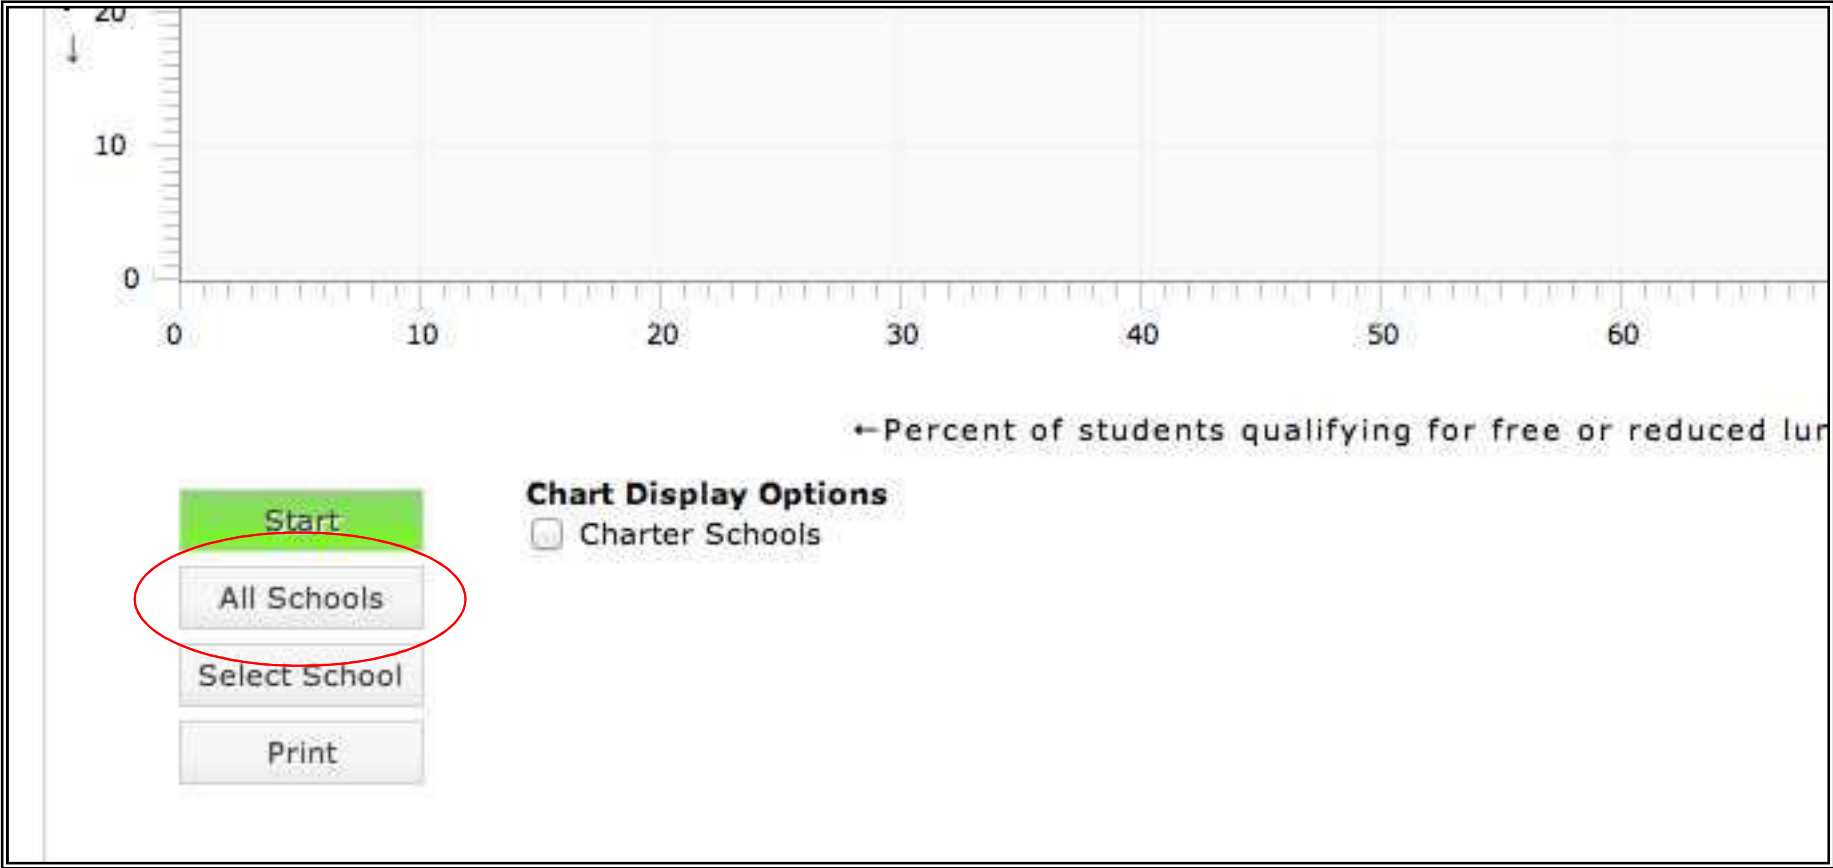

For the last seven years, the [Education Consumers Foundation](#) has worked to inform parents and others

First, find your state and click.

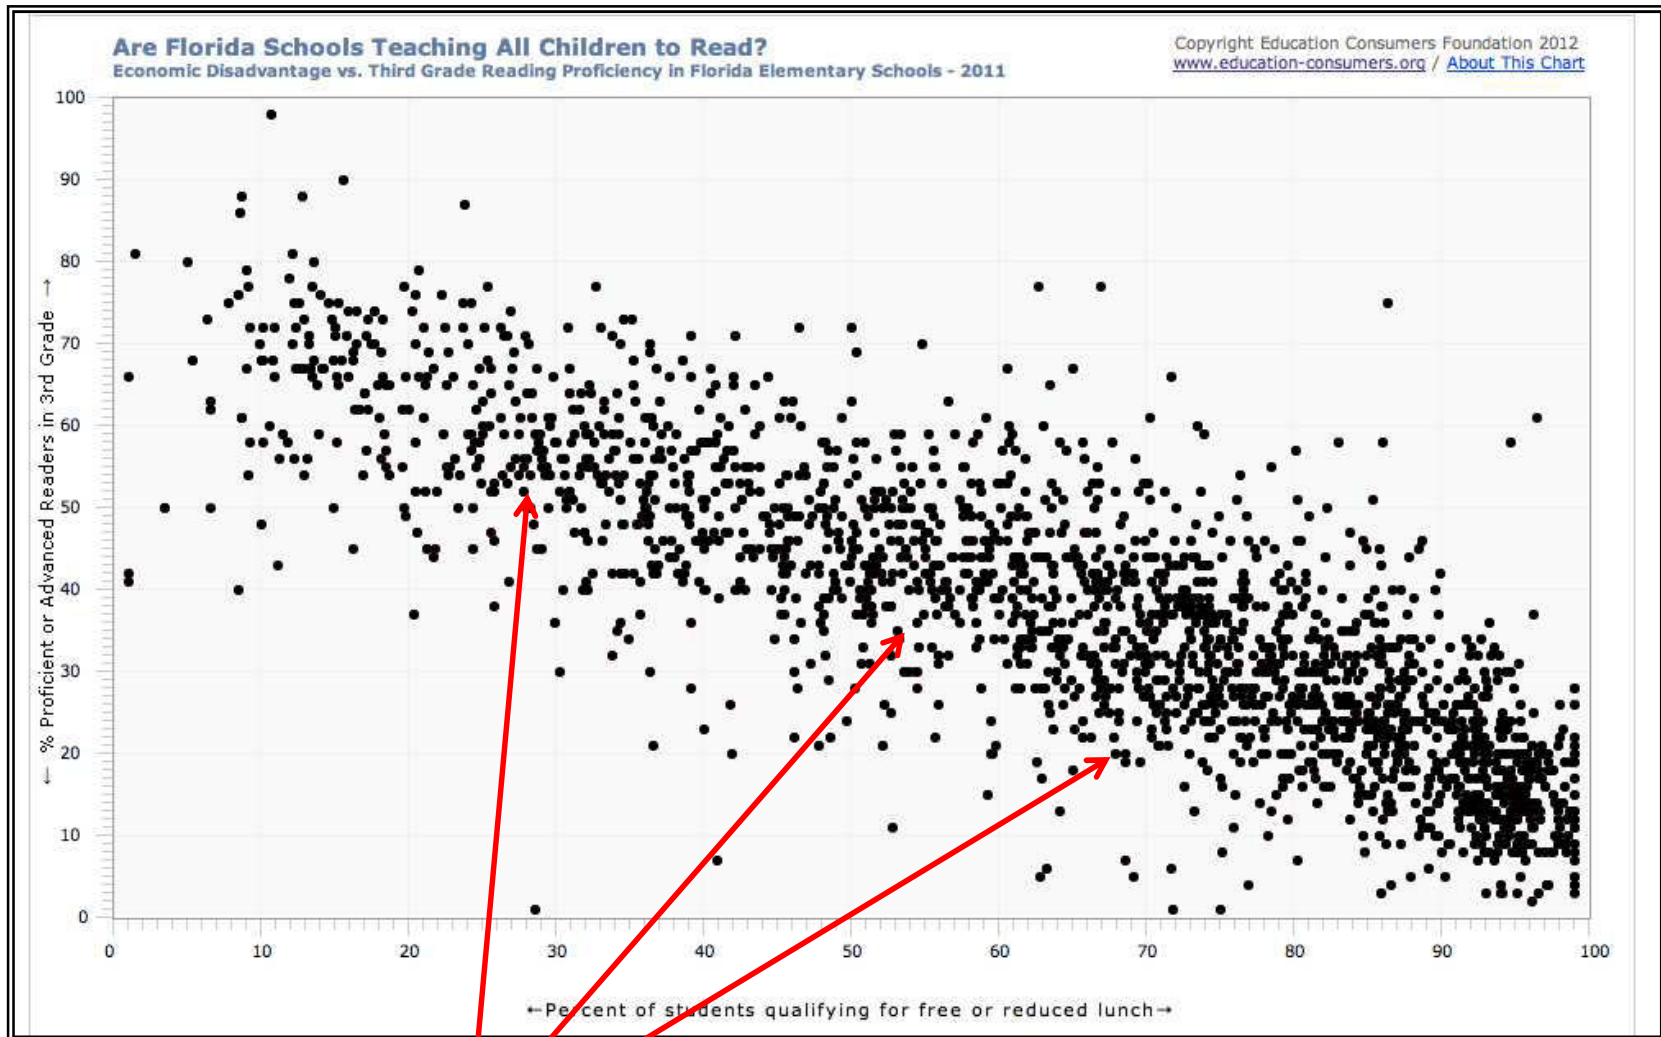

When the blank chart shows,  
you are ready to begin

Click **All Schools**.

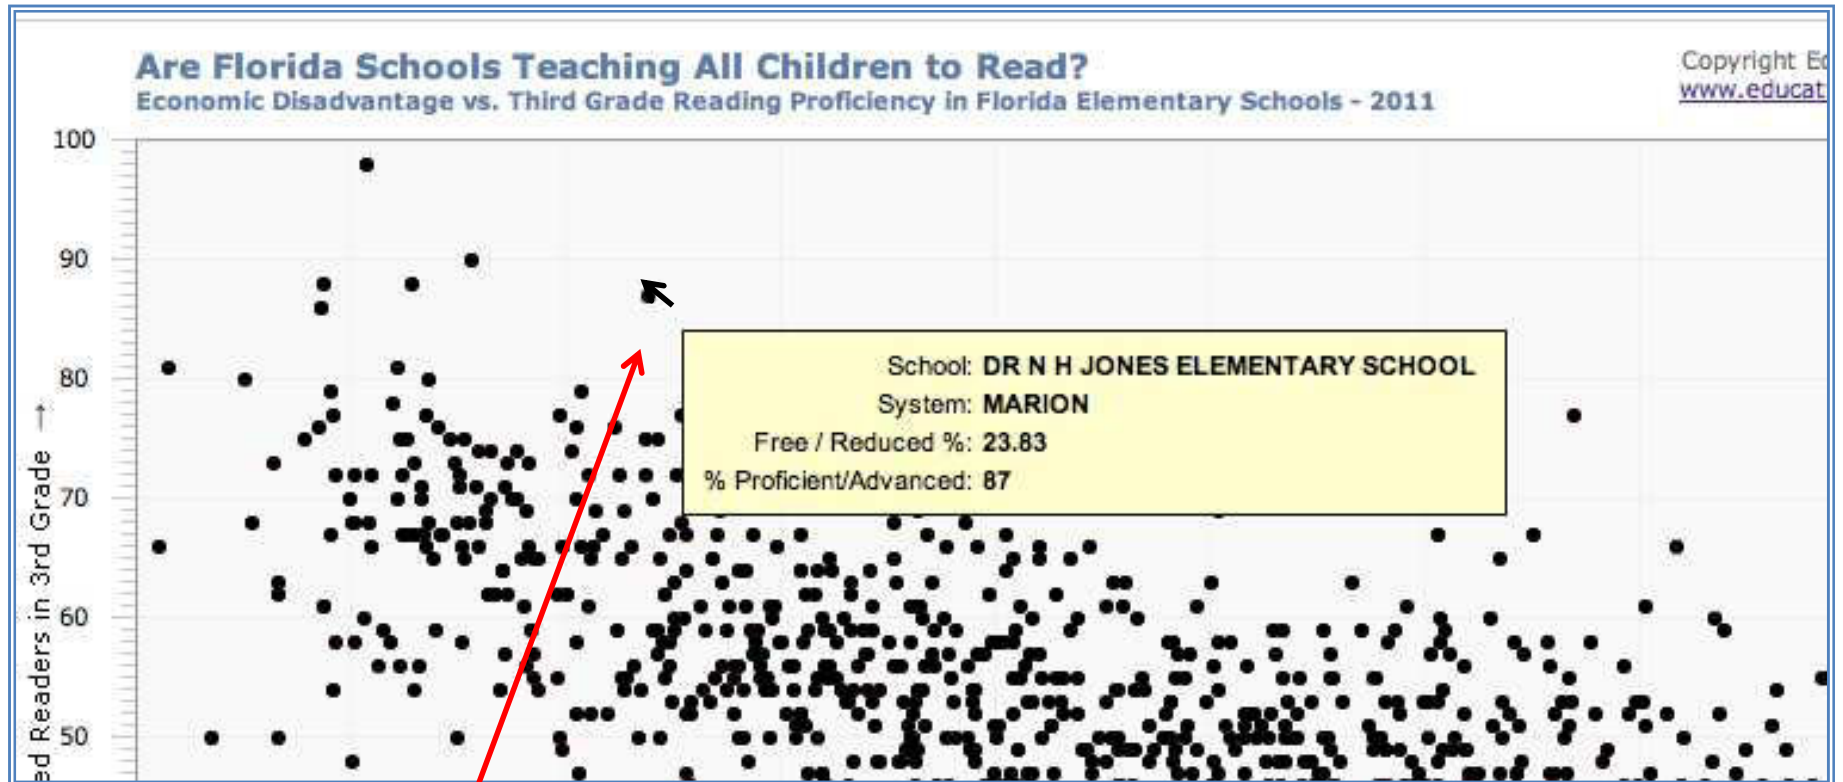

# All schools in the state are displayed

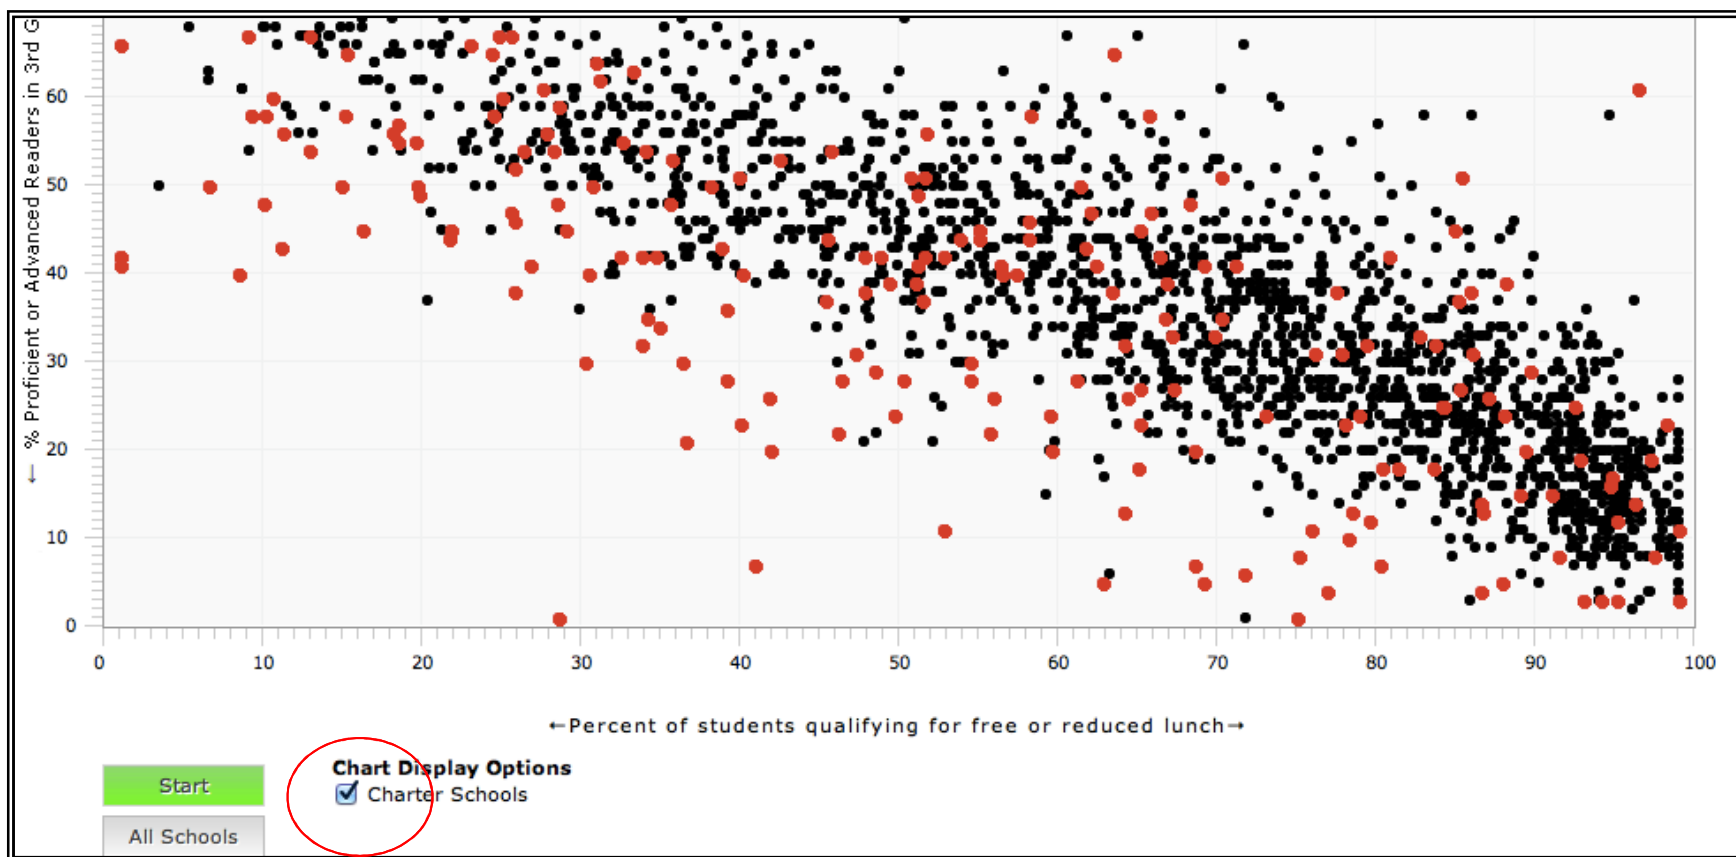

Each dot represents a school

Mouse over any dot to see the school's name and data.

Check the Charter Schools box to view all charter schools in the state

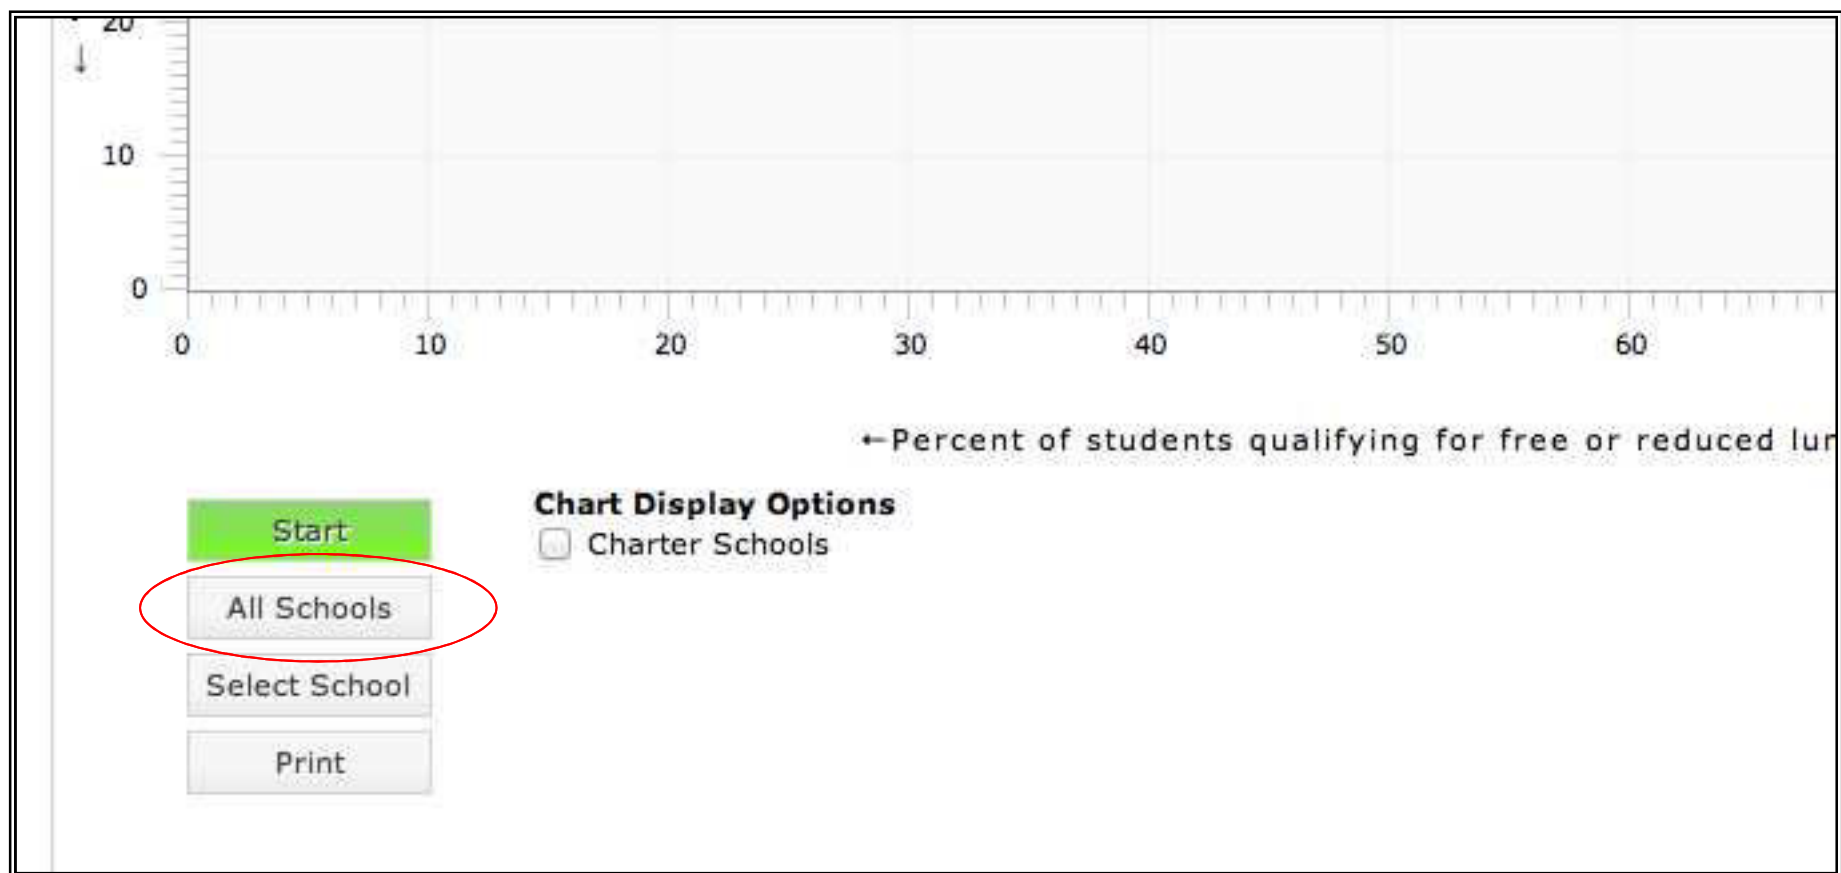

Charter schools will display as red dots on the chart.

# Points to Consider

---

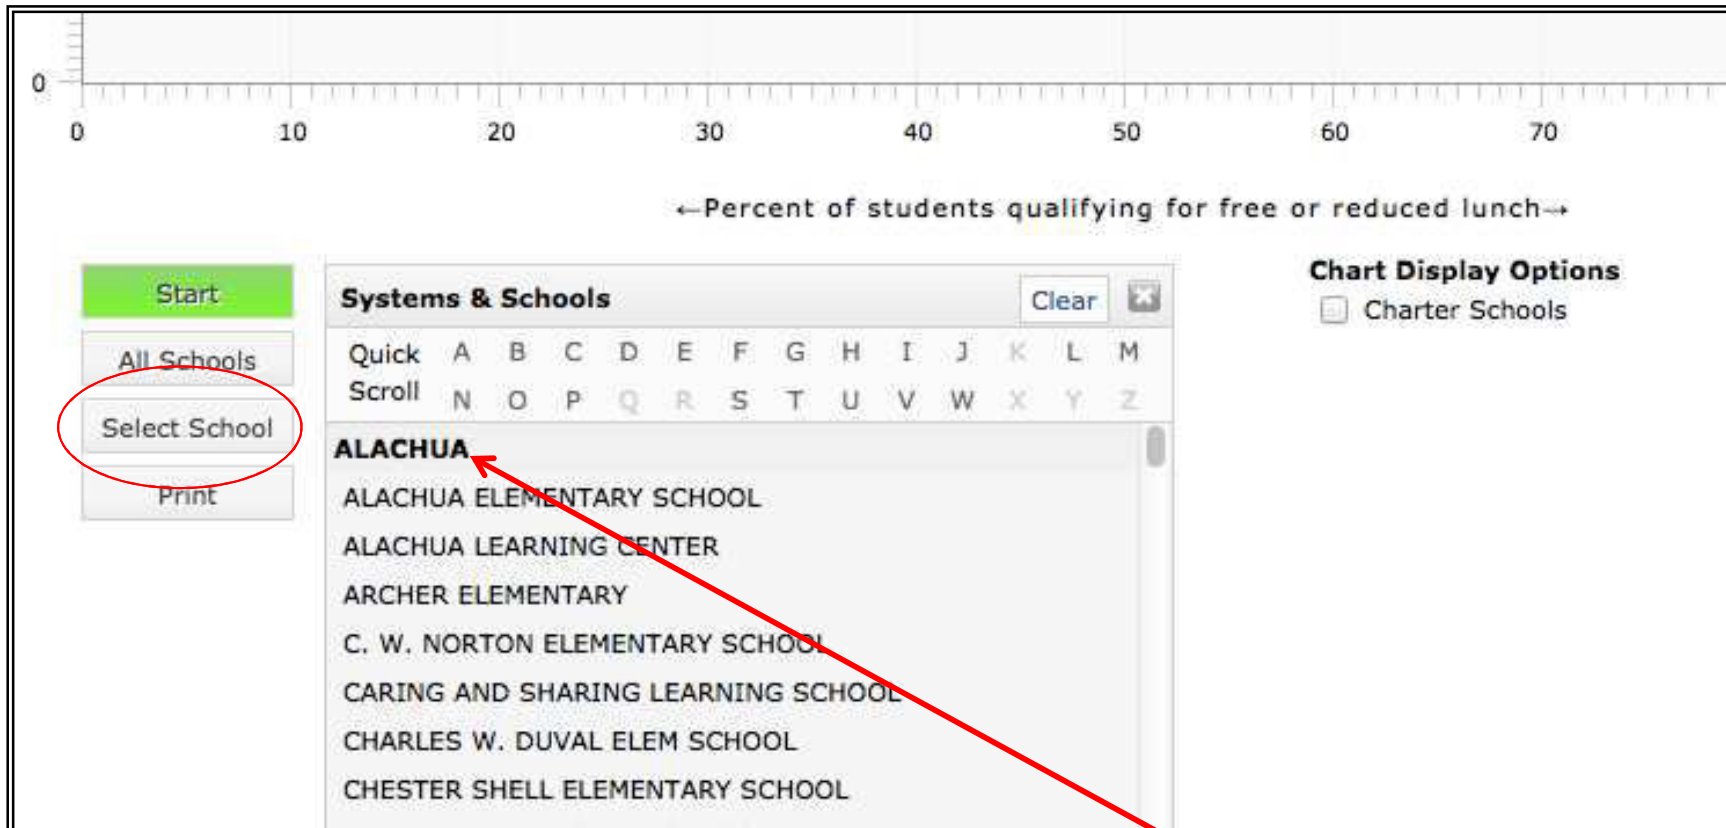

1. The children represented here have been in school for **four years**. Schools expect 90-95% of general education students to be proficient at this point.
2. At grade 3, schooling changes from “learning to read” to “reading to learn.”
3. At every level of disadvantage, some schools are producing several times as many proficient readers as their peers. **Poverty is not destiny.**

Click the “All Schools” button again to turn off the dots.

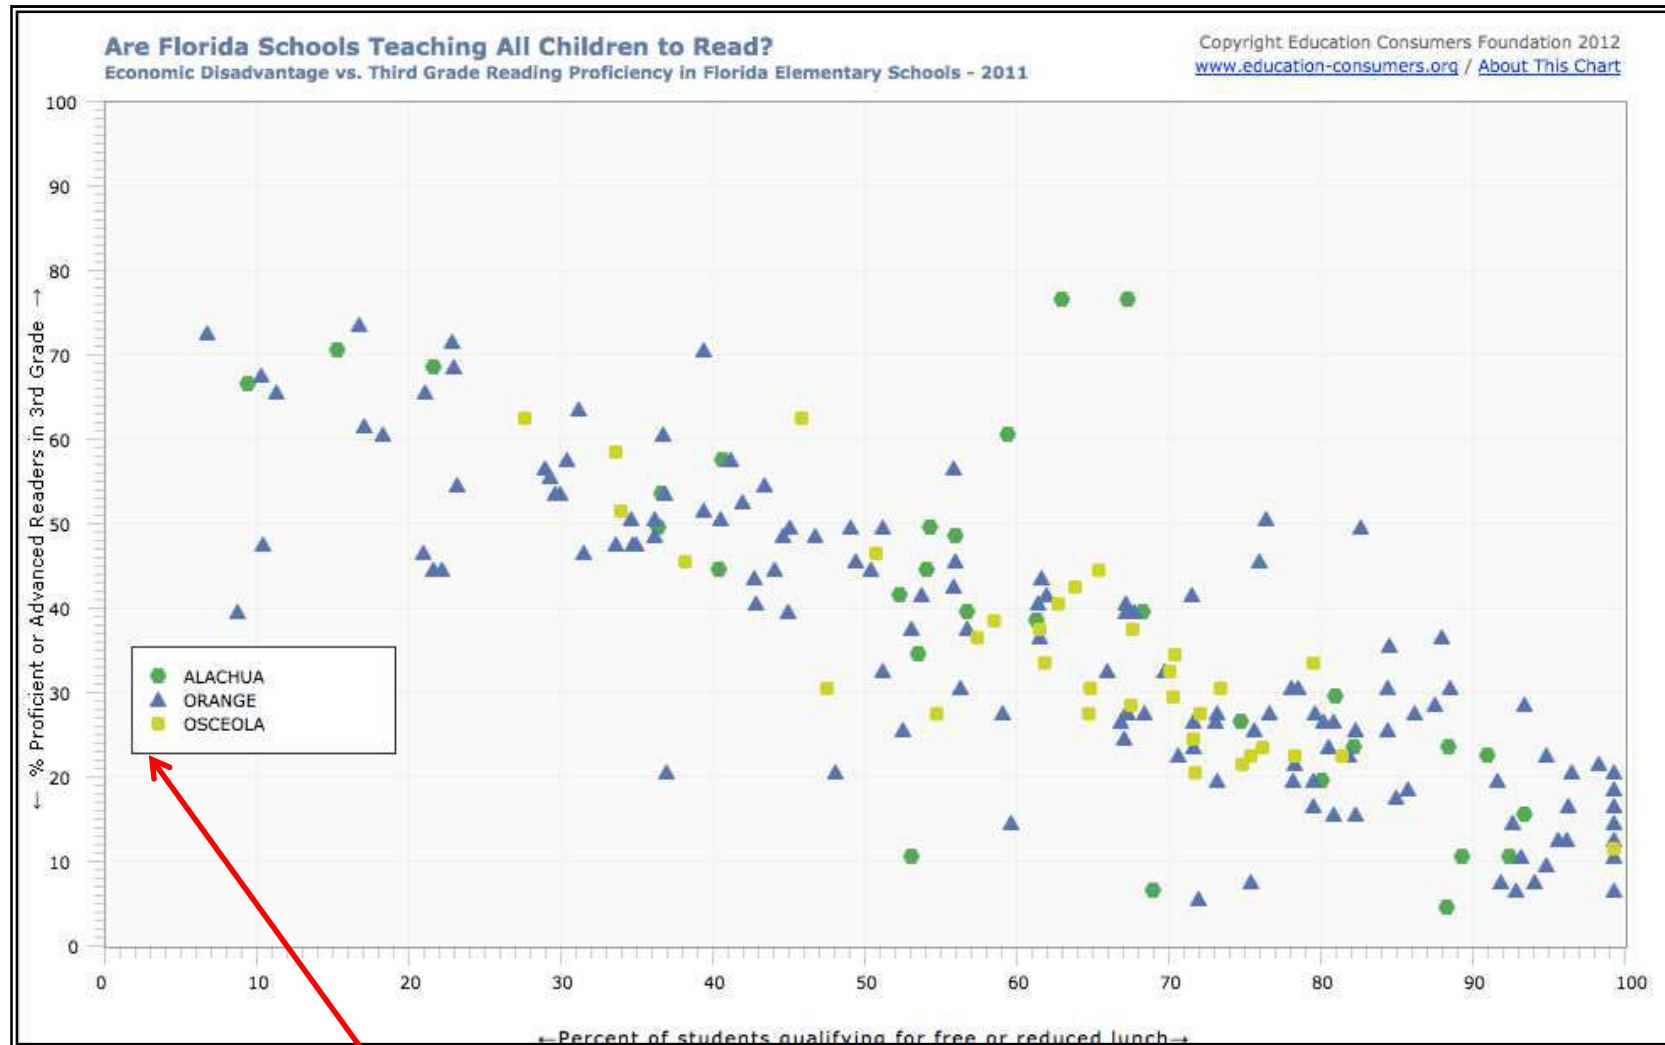

To compare schools & districts,  
click **Select School**.

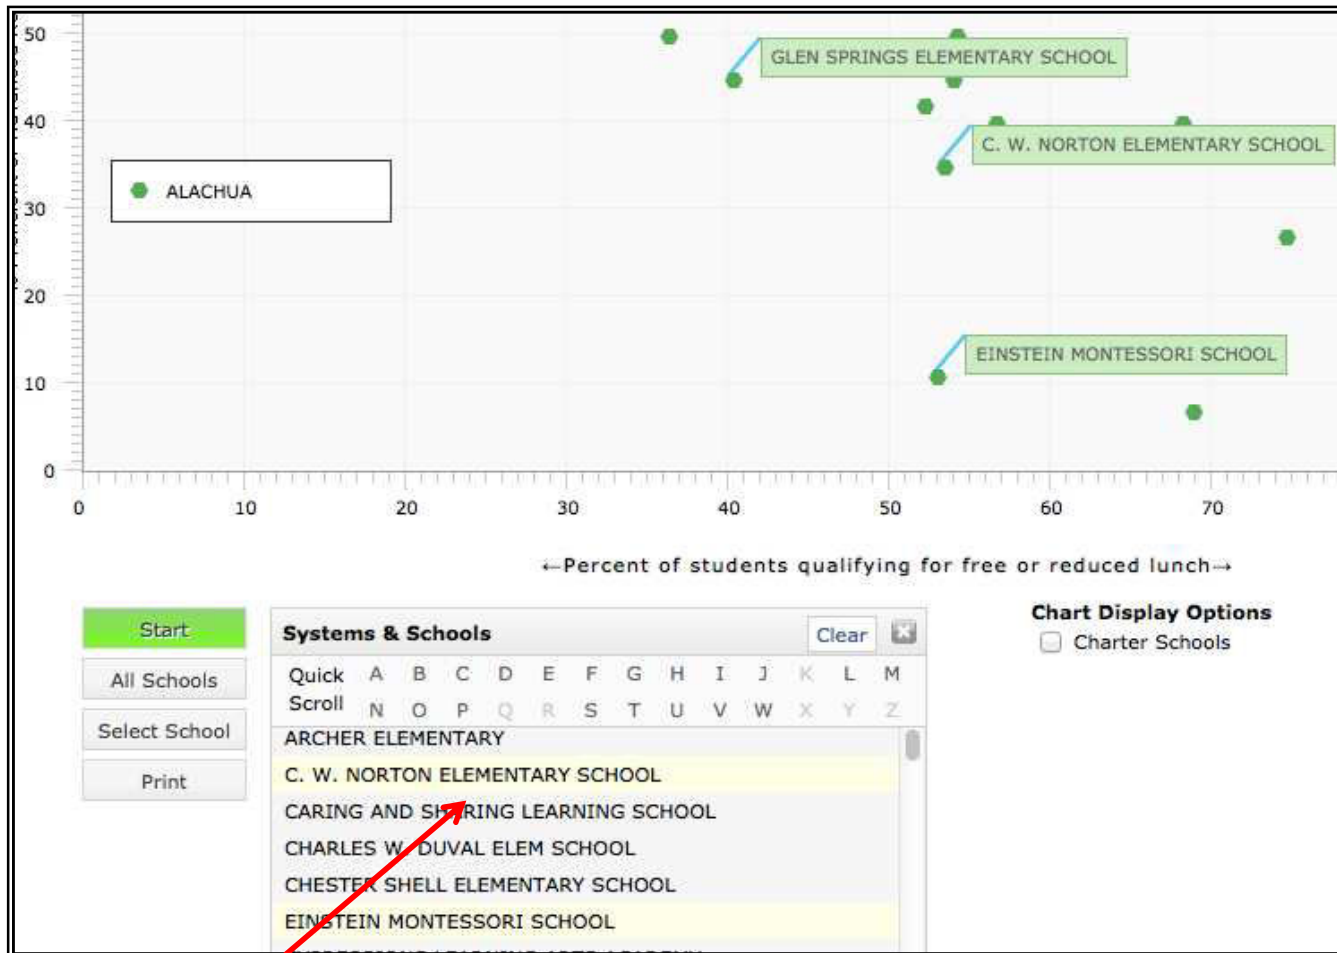

Then, click one or more district names.

# Your district's schools will display.

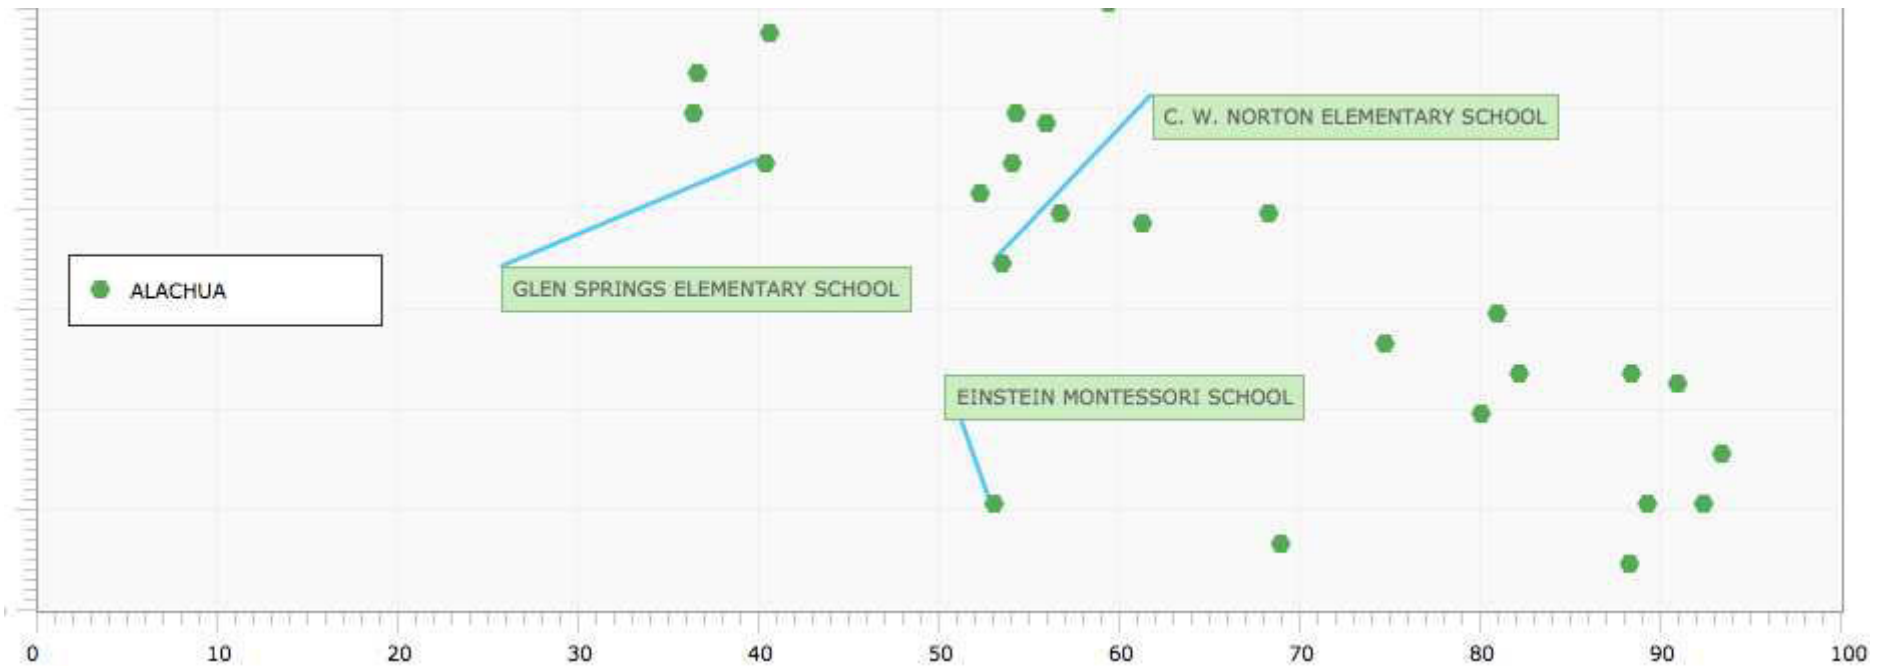

Each district will be represented by a unique icon.

Add a name tag for your school(s) by clicking the school name(s) in the menu.

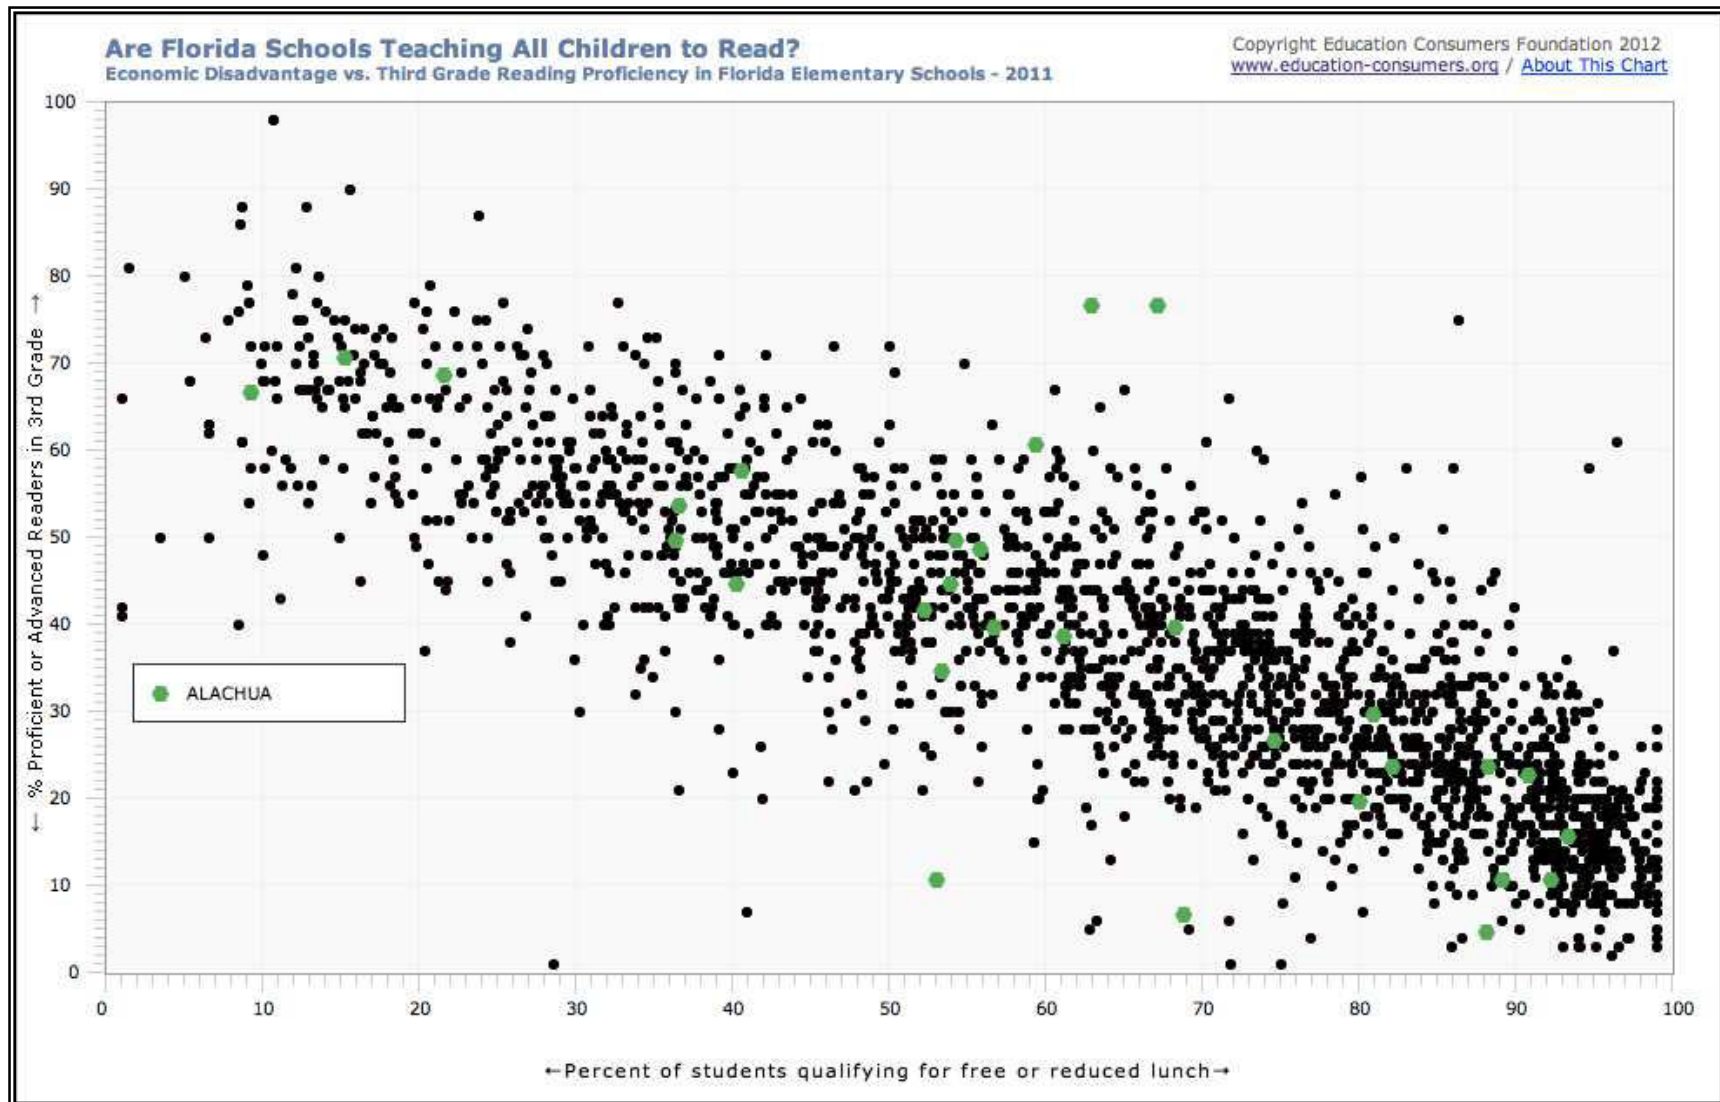

Display school name tags by clicking here.

For easier viewing, left click and drag the school name tags.

To compare your schools to the state,  
click **All Schools** again.

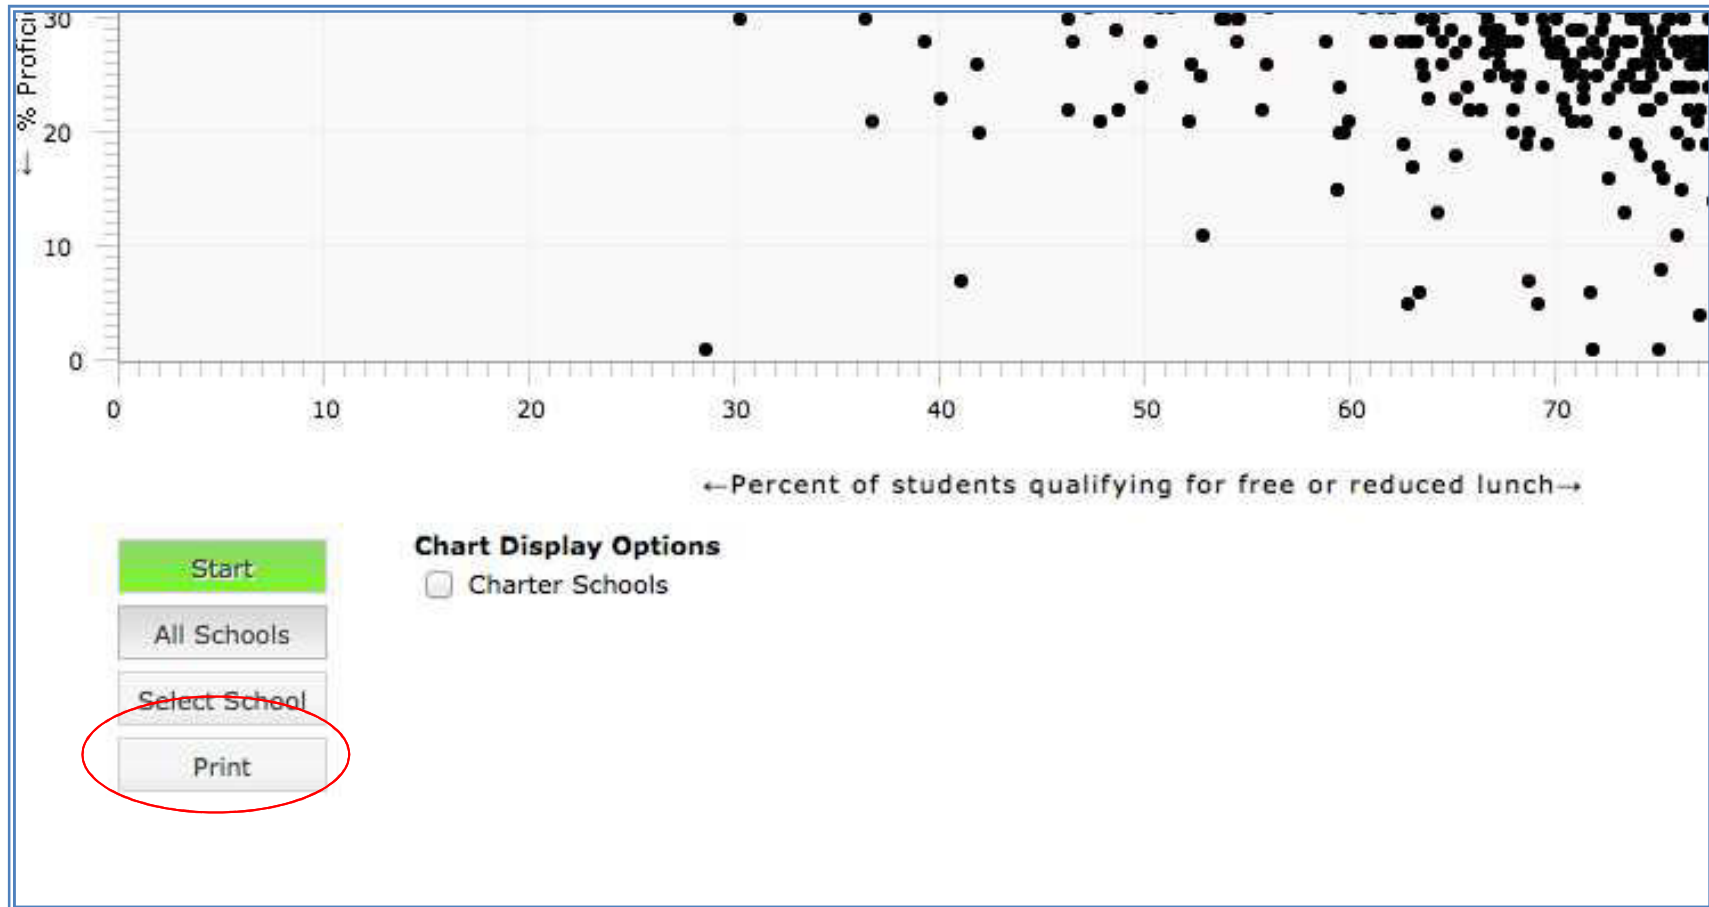

# More points to consider:

---

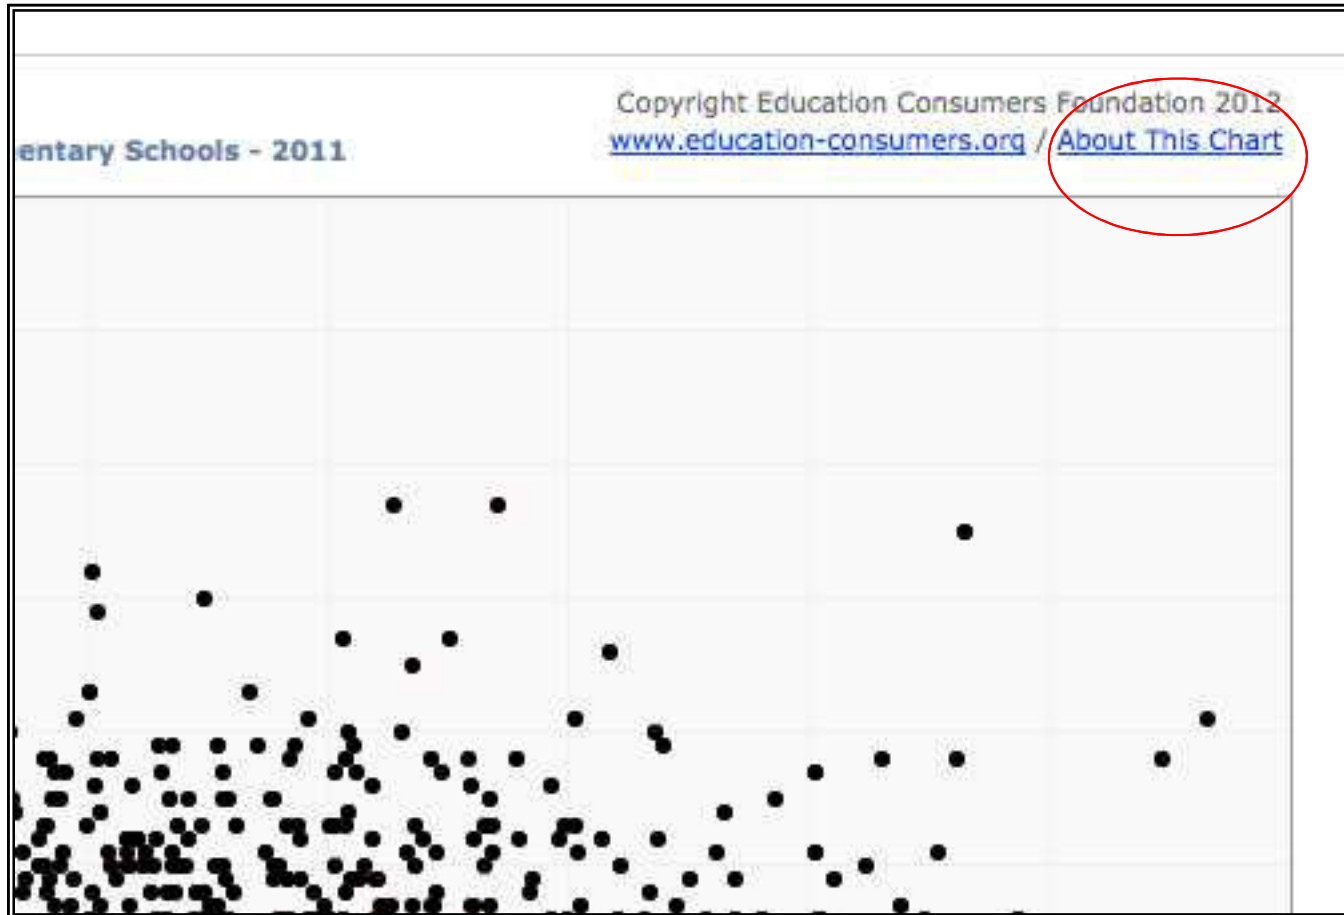

- How do your district's schools compare to each other?
- How do your district's schools compare to neighboring districts?
- How do your district's schools compare to the state?

Click **Print** for a copy.  
Charts display and print best in landscape.

\*PDF and PowerPoint available on request.

For more information, click the “About This Chart” link in the upper right corner.
